

## COMPANY PROFILE

# About Xient

---

Xient GmbH is a technology-driven management and transformation consultancy based in Leverkusen, Germany. Since its founding in 2011, it has helped organisations translate complexity into clarity - in strategy and transformation, data and analytics, AI enablement and governance, cybersecurity, and research and innovation.

It connects emerging technologies with the operational IT reality of large enterprises, and its European projects involving supercomputers and space are a particular point of pride. Its clients range from industrial mid-sized companies and hidden champions to DAX-listed corporations.

**Its ambition, in three words: focused, scalable, trusted.**
